

Open Systems Technologies "OST" (www.ostusa.com) is looking to add a full-time consultant to our ERP consulting practice. In this role, you will use your development expertise in the LN/Baan environment to translate customer specifications into customizations. Projects range from simple report changes to full blown custom modules with third party integrations, across all versions of the Baan/LN product line, as well as Infor ION.

Responsibilities

- Work with end users to understand development specifications
- Identify and communicate opportunities to improve existing and requested customizations
- Develop Baan/LN customizations according to customer specifications
- Maintain documentation for development projects
- Meeting project deadlines and budgets
- Support sales opportunities, and recognize/resolve of any client issues which could affect the client business relationship

Required Experience

- Minimum 4 years of hands-on experience in developing in Baan/LN
- Baan/LN 3GL/4GL language experience
- Baan/LN Development Tools experience
- Experience with file systems and OS scripting (Windows and *nix)
- Experience with SQL and Oracle querying
- A Bachelor's degree in Computer Science, Engineering, or related field preferred. Equivalent experience in Baan/LN development considered
- Strong verbal and written communication skills with the ability to communicate complex technical ideas to non-technical audiences
- Willingness to travel to client locations as needed; anticipated travel would be 10%.

Education

- Bachelor's degree in Computer Science, Engineering, or related field desired

About OST

www.ostusa.com

OST is an award-winning, 220-person, \$160m global technology and design firm with offices located in Grand Rapids, Detroit, Minneapolis, Chicago, London, Hong Kong and Singapore. OST is focused on enterprise data centers and business transformation services such as design strategy, software development, data analytics and IoT.
